

Acumence Announces AcuCan Version 5.4

Intuitive Dashboards and Enhanced Administration Tools Provide Greater Functionality and Ease of Maintenance

Chicago – May 25, 2005 – Acumence Incorporated, a leading provider of plant performance monitoring solutions for the beverage can industry has released version 5.4 of the AcuCan Server and Client. Version 5.4 brings increased functionality and flexibility that greatly enhances the operation and ease of maintenance for users.

Additional enhancements to Version 5.4 include:

- New powerful and intuitive dashboard designer to build customized, animated factory views.
- Enhanced Administration Client reduces installation time and complexity, and allows ease of configuration and maintenance by factory engineers.
- Now includes more comprehensive support for Oracle, MySQL, and MS SQL Server databases.
- New installation wizards standardize the installation process.
